# 3 DESIGN

## New product design

I help startups, entrepreneur or business owner to efficiently bring their idea to design. Starting by understanding their value proposition, user, job to be done and design intuitive UI based on what we have. I can help them to test their idea early and get user feedback to iterate soon enough.

## UX/UI audit

Improve current product UX and UI. This is for the product in operation, I collect data, understand the problem, then design solution and track performance.

## UI revamp

Boost branding and emotional connection of current product with the user by redesigning its visual design.
